Internship and Certifications

Newton School | Full Stack Web Development

October 2022 - Present

- Full Stack Web Development
- Throughout the bootcamp, I actively participated in weekly contests and completed assignments that challenged my skills and reinforced the concepts I learned.
- As part of the curriculum, I worked on several mini-projects where I applied my knowledge of HTML, CSS, and JavaScript to build functional and interactive web applications.
- Learning : Java , HTML, CSS, JavaScript, React.js, Bootstrap

Projects

Portfolio | Newton School ([link](#))

November 2023 - November 2023

Features:

- The portfolio is designed to be responsive, meaning it adjusts its layout and content to different screen sizes and devices.
- The website includes a navigation menu for easy navigation through different sections.
- It includes various visual effects using CSS.
- Users can switch between light and dark themes for better visibility and personal preference.
- When users hover over specific elements, such as buttons or images, they experience visual effects like shadows or color changes.

Tech Stacks: HTML, CSS, JavaScript, Font Awesome

Description: It is a personal portfolio, It showcases the skills, experience, and education of the individual. It follows a responsive design approach, ensuring that it is visually appealing and functional across different devices and screen sizes.

Features:

- Users can search for specific movies or TV shows.
- The application provides detailed information about each movie or TV show.
- Access official videos related to the content, such as trailers.
- Content is displayed in a carousel format for easy navigation.
- Users can explore information related to creators, directors, writers, and cast members. Details about the cast, including their names, roles, and images, are provided.
- Users can click on video thumbnails to watch videos in a popup modal.
- The website is designed to be responsive, meaning it adjusts its layout and content to different screen sizes and devices.

Tech Stacks: React, SCSS, Redux, React-youtube, Movie-trailer, TMDB API , React-icons, Vite

Description: The application is designed to display information about movies and TV shows. It includes features such as viewing movie details, cast, videos, recommendations, and similar content. Users can search for movies and TV shows, view details about them, and watch trailers.

The Souled Store-Clone | Newton School ([link](#))

October 2023 - December 2023

Features:

- Users can add products to their shopping cart and manage wishlists.
- Signup and login functionality for user authentication.
- Displaying a list of products, potentially with filtering options based on categories.
- The website is designed to be responsive, meaning it adjusts its layout and content to different screen sizes and devices.

Tech Stacks: React, Redux, Chakra-UI, API, CSS, JS

Description: It is a Ecommerce web application that emulates the functionality and design of "The Souled Store" e-commerce platform. The Souled Store is a prominent fashion brand known for its exclusive collection of clothing and accessories for men and women.

Zee5-Cinema-Clone | Newton School ([link](#))

October 2023 - November 2023

Features:

- It provides a different UI for smaller screens.
- Users can search for specific movies or TV shows.
- The application provides detailed information about each movie or TV show.
- Access official videos related to the content, such as trailers.
- Content is displayed in a carousel format for easy navigation.
- Users can add or remove videos from their watchlist. The state of each video's watchlist status is tracked.
- The application displays video details, including title, age rating, release year, type (e.g., movie, documentary), genre, and cast and director information.
- The website is designed to be responsive, meaning it adjusts its layout and content to different screen sizes and devices.

Tech Stacks: React, inline CSS, Chakra UI, Movie-trailer, External API , React-icons

Description: The application is designed to display information about movies and TV shows. It includes features such as viewing movie details, cast, videos, recommendations, and similar content. Users can search for movies and TV shows, view details about them, and watch trailers.
